## Silgrain® HQ MicronCut

Elkem ASA Silicon Products  
 Drammensveien 169 P.O. Box 334  
 Skøyen NO-0213 OSLO  
[www.elkem.com](http://www.elkem.com)

**Description** Silgrain® HQ MicronCut is a high purity micronised silicon powder.

**Applications** Raw material in the ceramic industry.

**Chemical analysis & physical data**

	Typical	Min	Max
Si wt%*	99.8	99.7	-
Fe wt%	0.04	0.02	0.05
Al wt%	0.09	0.07	0.12
Ca wt%	0.013	0.005	0.02
Ti wt%	0.001	0.001	0.005
B ppmw	30	-	35
P ppmw	25	-	35

*Other trace elements on request. Fe, Al, Ca and Ti measured by XRF (X-ray fluorescence). P and B measured by ICP (Inductively Coupled Plasma). Si wt%\* = 100 wt% - Fe wt% - Al wt% - Ca wt% - Ti wt% - 0.1 wt%. The 0.1 wt% is subtracted as a lump sum of other metallic elements in silicon.*

**Sizing** Typical sizes are 0-10 µm, 0-45 µm and 0-75 µm. Other sizes can be delivered upon request. All Silgrain® HQ MicronCut products have a well-defined top cut with max. 1 vol% oversize according to laser diffraction analysis.

**Packaging** Silgrain® HQ MicronCut is typically delivered in 25 kg paper bags or 1000 kg big bags.

**Storage and handling** Store under dry conditions. Avoid handling that generate dust build-up. Avoid ignition sources (e.g. welding) in areas with high dust concentrations.

**Shelf life** Unlimited when stored under dry conditions.

**Health, safety & environment** The product does not meet the criteria for hazard classification according to Regulation (EC) No 1272/2008 (CLP) and UN GHS (7<sup>th</sup> rev.). For more information, please refer to Elkem Product Safety Information No. 302.

**Quality assurance** Elkem's management system is certified to ISO 9001:2015.

**Sustainability** Elkem's climate roadmap is detailing how the company plans to develop its business in line with the aim of the Paris Agreement of limiting global warming to well below two degrees. The company aims to reduce its total fossil CO<sub>2</sub> emissions by 28% from 2020 to 2031. Elkem's long-term goal is net zero emissions by 2050. For further information, please visit [www.elkem.com/sustainability/](http://www.elkem.com/sustainability/).

Climate change (IPCC2013 GWP 100a v1.03): 5,94 kg CO<sub>2</sub> eq / kg. Calculation from 2020 based on 2018 and 2019 actual production data including scope 1, 2 and 3.\*\*
